

# Pack Summary

Winter can seem like a quiet time, a waiting time, in the natural world. However, there is a lot going on! Explore the passage of time on your adventure today. Begin by learning about time in the plant and animal world. Then, look into how the earth's movement around the sun affects human perceptions of time and seasons. Finally, take an imaginary step back into the bigger picture with geologic time and some poetry.

Level:

## Content:

### Activities

Plant Hunt  
Shadow Investigation  
A Year at Prescott Farm  
Make a Calendar  
Seasonal Poetry
