

Polliwog Summer Session

7/10 Week One: Mud"tastic"

Mud is fantastic for our BRAINS! It contains Mycobacterium Vaccae which stimulates the immune system and increases the levels of serotonin in our brains. Come prepared for a MUD Run (kid's version) obstacle course.

7/17 Week Two: Glorious Bugs

It's a Pollinator Palooza! We will discover what bugs help pollinate here on the farm. Bugs need homes so we'll make a bug hotel to take home. Hopefully we can see a few cool little critters up close too.

7/24 Week Three: Water UP! Water DOWN! Water all AROUND!

What does "evaporation" mean? Come learn about the wonders of our water cycle and plan to get wet! We will have a "splashing" good time playing and dancing with Rainy! (puppet)

7/31 Week Four: Acorn Was a Little Wild

Come along and discover the wonders of a traveling Acorn! Take a short hike into the forest with Stasher. (puppet) He will help us hunt for deciduous trees and his missing acorns.

8/7 Week Five: Woodland Fairies

Fairies have wands! Come collect nature glitter to grind with mortar and pestle. We will use our glitter to make nature wands of our own. After that we'll venture into the magical forest in search of a fairy home.

8/14 Week Six: Walnuts are NOT just for Eating

Black walnuts are aplenty here at the farm. They have the best natural dye in the hull. Come hammer a walnut, make dye and then tie dye a bandana to bring home.
